Solar Lamp Location

For optimum light duration throughout the night, it is very important to mount your solar lamp in a spot where it will receive the maximum amount of direct sunlight throughout the day

For best results, the solar light must be charged in the “ON” (High or Low) position for at least 2 days of full direct sunlight.

What's In The Box

A = Light Fixture

Screws x2
with Anchors

Assembly Instructions

NOTE: The following steps are for reference only. Consult your local hardware store for the best installation method for your specific surface.

- Separate the light housing unit and wall mount bracket by removing the four screws on the sides of the fixture

- Use the two mounting holes in the wall mount bracket as a guide to drill two holes no larger than the anchors and insert the wall anchors.

- Align the wall anchors with the holes on the wall mounting bracket and partially install a screw into the top mounting hole first, then align and level the fixture with the bottom hole before tightening both screws to secure it to the wall.

NOTE: The switches should be facing downward at the bottom of the fixture.

- Align the light fixture unit with the wall mount bracket and secure them together using the four screws you removed.

NOTE: Do not over-tighten the screws to avoid damage.

Operation Instructions

- Move the operation switch to the High or Low position according to your preferences:

Low = softer light, longer duration

High = brighter light output

- Turn the color temperature to your desired preference:

WW = 3000K Warm White

NW = 4000K Natural Warm

BW = 5000K Bright White

Replacement Parts

Replacement Batteries are available at www.gamasonic.com or via our Toll Free number: +1-800-835-4113.

Your lamp uses two of the following battery:
GS32V30

Replacing the Batteries

GAMA SONIC®
SOLAR LIGHTING

After several years of use, the battery may need replacing.

1. Switch the unit to the OFF position.
2. Separate the light housing unit and wall mount bracket by unscrewing the four screws on the side.
3. Unscrew the two screws on the battery cover and remove it.
4. Unplug the connector and remove the old batteries.
5. Make sure the new batteries are a high-quality Li-Ion battery with matching connector, Part# GS32V30.
6. Clip in the new batteries and install the batteries in the compartment.
7. Reassemble the lamp by reversing steps 1-4

Batteries are available for purchase at www.gamasonic.com

MAINTENANCE

Clean the solar panels regularly with a damp towel to guarantee optimum performance. Do not use any type of solvent for cleaning and be careful not to put too much pressure on the solar panels while cleaning.

TROUBLESHOOTING

If your solar light does not come on as expected despite observance of all the instructions, please try the following steps:

1. Make sure that the solar lamp is not being affected by any other light source.
2. Ensure the solar lamp is not positioned in the shade during the day.
3. Check that the batteries are installed correctly.

NOTE: The performance of the solar lamp will vary with the time of year. It will last longer when it has had a full day in the sun rather than a day in overcast weather.

WINTERTIME TIPS: For optimal performance, be sure to remove any snow or debris accumulation from solar panel(s). A solar panel free of debris will charge the batteries much more efficiently.

WARNING: Please keep out of reach of children. Do not dispose of Li-Ion battery in the regular trash, municipal waste stream or by fire as batteries may leak or explode. Do not open, short circuit, or mutilate batteries as injury may occur. Preserve our environment by recycling Li-Ion batteries or disposing of them in accordance with local, state and federal regulations. Do not mix old and new batteries.
